March 15, 2019

The Honorable Michael J Dunleavy  
Governor  
State of Alaska  
P.O. Box 110001  
Juneau, Alaska 99811-0001

Dear Governor Dunleavy,

I am pleased to present to you the Department of Revenue's Spring 2019 revenue forecast. The 2019 spring forecast is based on additional information and data received since publishing last fall's forecast of state revenues. This update is a collaborative effort among the Department of Revenue and several other state agencies.

Unrestricted General Fund (UGF) revenue is now forecast to be \$2.7 billion in fiscal year FY 2019 and \$2.3 billion in FY 2020. The forecast does not include the transfer from the Permanent Fund Earnings Reserve. The Permanent Fund is expected to transfer \$2.7 billion to the general fund in FY 2019 and \$2.9 billion in FY 2020. These amounts include funds for both payment of dividends and general government spending.

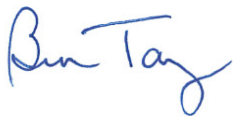

The forecast represents a decrease in expected UGF revenue of \$89 million for FY 2019 and an increase of \$39 million for FY 2020, compared to the projection in the fall 2018 forecast. Beyond FY 2020, the unrestricted revenue forecast has been decreased by between \$50 million and \$100 million per year for FY 2021-2028.

The revenue forecast is based on an annual Alaska North Slope (ANS) oil price of \$68.90 per barrel for FY 2019 and \$66.00 for FY 2020. Based on a review of oil market fundamentals, the department chose not to revise its view on long term oil price since the fall forecast. Long term, we continue to expect oil prices to stabilize in the low \$60's in real terms.

The revenue forecast is also driven by an expectation for North Slope oil production to average 511,500 barrels per day in FY 2019 and increasing to an average of 529,500 barrels per day in FY 2020. The production forecast is prepared in collaboration with the Department of Natural Resources and reflects an updated assessment on future production which slightly adjusted production expectations for the next several years.

I hope you find the information provided in the spring 2019 forecast to be interesting and useful. We look forward to providing you with the next full forecast in the fall of 2019.

Sincerely,

A handwritten signature in blue ink that reads "Bruce Tangeman". The signature is written in a cursive style with a large initial "B" and a long, sweeping underline.

Bruce Tangeman  
Commissioner

# Executive Summary

## General Discussion

The spring forecast is an annual update of the revenue forecast published in the preceding fall, for use by the Governor, the Alaska Legislature, and the Alaska public. This update is a collaborative effort by the Department of Revenue, the Department of Natural Resources (DNR), the Alaska Permanent Fund Corporation, and the Office of Management and Budget.

State revenue comes from four major sources:

1) Petroleum revenue; 2) Non-petroleum revenue from sources such as taxes, charges for services, licenses and permits, fines and forfeitures; 3) Federal revenue; and 4) Investment revenue, primarily from the Alaska Permanent Fund and the Constitutional Budget Reserve Fund (CBRF).

Unrestricted general fund (UGF) is estimated to be \$2.7 billion for FY 2019 and \$2.3 billion for FY 2020. The transfer from the Permanent Fund Earnings Reserve, as authorized by the enactment of SB 26 in 2018, will be \$2.7 billion in FY 2019 and \$2.9 billion in FY 2020. The amounts transferred in each fiscal year are for both payment of Permanent Fund Dividends and for general government spending.

This spring forecast reflects a change in expected UGF revenue compared to the fall 2018 forecast, with projected UGF revenue reduced by \$89 million for FY 2019 and increased by \$39 million for FY 2020. Revenue projections for the remainder of the forecast years have been lowered, with reductions ranging between \$50 million and \$100 million per fiscal year.

The spring revenue forecast is based on an increased average Alaska North Slope (ANS) oil price forecast of \$68.90 per barrel for FY 2019, up from the \$67.96 per barrel ANS price forecast incorporated into the fall 2018 forecast. The revised FY 2019 ANS oil price forecast is based on actual ANS oil prices for July through February, and monthly prices averaging \$67.00 for March through June, consistent with current futures market prices. Nominal per-barrel ANS prices are now expected to average \$66.00 in both FY 2020 and FY 2021, then gradually increase to \$77.00 by FY 2028, as a result of inflation.

The spring forecast for ANS crude oil production revises the expected production levels in FY 2019 from 526,800 barrels per day to 511,500 barrels per day, based on lower-than-expected production over the past several months. The revised forecast reflects eight months of actual daily production levels, as well as revised production estimates for the remainder of the fiscal year. ANS production is forecast to average 529,500 barrels per day in FY 2020, decline to 469,100 barrels per day in FY 2024, and then begin increasing again to 500,600 barrels per day by FY 2028. The spring production forecast was compiled by DNR using the same method as was used for the fall 2018 production forecast.

Expenditures for cash repurchase of tax credits, whether through appropriation or bonding, are separately estimated and not included in revenue numbers presented in the forecast. In FY 2018, the state purchased \$75 million in tax credits through the Oil and Gas Tax Credit Fund (AS 43.55.028) and purchased an

additional \$103 million in FY 2019. The statutory appropriation to the Oil and Gas Tax Credit Fund for FY 2020 credit purchases is forecast to be \$181 million for FY 2020. Therefore, it is estimated that \$181 million in tax credits will be repurchased in FY 2020. For FY 2021, an estimated \$611 million in tax credits will be available for state repurchase, with the majority of these being credits earned in prior years.

In FY 2018, total state revenue from all sources amounted to an estimated \$12.4 billion. Total state revenue for FY 2019 is expected to decrease to \$11.5 billion, due primarily to the performance of the Alaska Permanent Fund and other investments returning closer to historical levels than they did in FY 2018. In FY 2020, total state revenue is forecast to be \$11.0 billion.

In addition to unrestricted and restricted revenue, the department also provides information on current-year revenue subject to appropriation, as this provides an accurate depiction of the state's ability to meet its obligations to outside analysts who may not be familiar with Alaska's budget conventions. In addition to unrestricted revenue, "current-year revenue available for appropriation" also includes designated general fund revenue, earnings of the CBRF, various royalty and tax deposits to the Constitutional Budget Reserve, and various royalty and tax deposits in excess of the constitutional minimum into the Permanent Fund. Current-year revenue subject to appropriation is estimated at \$6.0 billion for both FY 2019 and FY 2020.

## **Forecast Method Notes**

The FY 2018 historic numbers in this document have been updated from the *Fall 2018 Revenue Sources Book* to reflect the latest available information about actual expenditures and collections.

When comparing forecasts provided by the department, numbers may vary between analyses, even if they came from the same data source. This can happen for many reasons and does not necessarily discount other analyses, nor should it be considered an error.

One example is in petroleum revenue forecasting, where results can differ depending on whether the department uses confidential company-specific data or statewide aggregated summary data. Another instance where differences can occur is in how uncertainty is incorporated. Depending on the analysis, uncertainties can be addressed by applying risk factors to the data, incorporating probability into the analysis and results, or providing narrative disclaimer about the uncertainty.

Therefore, even though all the department's models start with the same set of data, the results can differ depending on the aggregation of data and the handling of uncertainty.

<sup>1</sup> Under current law, insurance premium tax is considered designated restricted revenue and will revert to unrestricted revenue beginning in FY 2019.

<sup>2</sup> Starting with FY 2018, the non-aviation portion of the motor fuel tax is considered designated restricted revenue.

<sup>3</sup> Starting with FY 2019, transfer revenue from the Alaska Capital Income Fund is considered designated restricted revenue.

	History	Forecast	
	FY 2018	FY 2019	FY 2020
<b>North Slope Price</b> (dollars per barrel)			
ANS West Coast	63.61	68.90	66.00
Transit Costs & Other	9.52	8.41	8.81
ANS Wellhead	54.09	60.49	57.19
<b>North Slope Production</b> (thousand barrels per day)			
Total ANS Production	518.4	511.5	529.5
Royalty and Federal <sup>1</sup>	62.2	61.2	59.0
Taxable Barrels	456.2	450.3	470.5
<b>North Slope Lease Expenditures<sup>2,3</sup></b> (millions of dollars)			
Total North Slope Lease Expenditures			
Operating Expenditures [OPEX]	2,649.2	2,714.0	2,801.9
Capital Expenditures [CAPEX]	1,729.4	1,907.5	2,716.0
Total North Slope Expenditures	4,378.6	4,621.5	5,517.9
Deductible North Slope Lease Expenditures			
Operating Expenditures [OPEX]	2,581.0	2,631.1	2,677.7
Capital Expenditures [CAPEX]	1,485.1	1,631.3	2,016.5
Deductible North Slope Expenditures	4,066.1	4,262.3	4,694.2
<b>State Production Tax Revenue</b>			
Tax Revenue (millions of dollars)	749.9	735.0	524.7
Production Tax Collected per Taxable Barrel (dollars per barrel)	4.5	4.5	3.0
<b>Statewide Production Tax Credits<sup>2,4</sup></b> (millions of dollars)			
Credits Used against Tax Liability	1,092.6	1,293.0	1,292.0
Credits for Potential Purchase	75.4	102.8	181.0

<sup>1</sup> Royalty and Federal barrels represent the Department of Revenue's best estimate of barrels that are not taxed. This estimate includes both state and federal royalty barrels, and barrels produced from federal offshore property.

<sup>2</sup> Lease expenditures and credits used against tax liability for FY 2018 were prepared using unaudited company-reported estimates.

<sup>3</sup> Expenditure data for FY 2019 and FY 2020 are compiled from company-submitted expenditure forecast estimates and other documentation as provided to the department. Expenditures are shown here in two ways: (1) total estimated expenditures including for those companies with no tax liability; and (2) estimated deductible expenditures for only those companies with a tax liability.

<sup>4</sup> Production tax credits shown include all production tax credits and all areas of the state. Assumptions for the \$12 million credits for small Alaska producers are included in the table. Per-Taxable-Barrel credits for oil not eligible for the gross value reduction may not reduce a producer's liability below the minimum tax; that limitation is reflected in these estimates.

<sup>5</sup> For historical credits against tax liability, geographic location was determined by attributing all .023(l) credits to Non-North Slope, all .025 Credits to North Slope, and the other credits were placed according to where the company primarily operated. Since multiple companies had operations in multiple areas, these numbers should be treated as rough estimates.

<sup>6</sup> For FY 2014, the Per-Taxable-Barrel Credit was in effect for only the last six months of the fiscal year. Credits applied against liability in the forecast are limited by a company's tax liability including the minimum tax.

<sup>7</sup> This row includes estimates of carried-forward credits for previous calendar years for companies with over 50,000 BOE of production. Carried-forward credits are primarily for net operating losses under AS 43.55.023(b).

<sup>8</sup> Tax value is calculated by multiplying the amount of carried forward annual loss by the statutory 35% tax rate.
